Good morning [REDACTED],

Just to introduce myself – I will be your new EA site inspector for your Environmental Permit. If you could ensure that all returns etc are sent through to me going forward. Similarly, please feel free to contact me should there be any technical queries regarding the permit.

Secondly, I would like to arrange a site inspection soon. With this in mind do you have availability on any of the following – March 17, 20, 31, April 1, 11. I would like to look focus on your emissions to atmosphere but would also like to discuss the regulatory changes which will be applicable to the chemical sector under the UK Waste Gas for Chemicals BAT Reference document and the Common Waste Water BReF. As such I would imagine this would take most of the day. If none of the above are any good please feel free to propose alternatives.

Thanks in advance
